

## Role Card: **Private Reader (Voice of Privacy & Confidentiality)**

**VOICE:** "My reading history is my personal business. I need to know that my interests stay private and won't be judged or exposed."

### **Primary Concerns:**

- Leaking of sensitive or "atypical" reading habits.
- Staff or other users seeing my borrowing history without a strict legal or operational reason.
- Data being used to build a profile of my personality or beliefs.

### **What You Advocate For:**

- Anonymizing borrowing records once a book is returned and fees are paid.
- Librarians should only see what is necessary for the current transaction.
- Searching the catalog without sharing search history.

### **Key Questions You Raise:**

- Who exactly can see what I have borrowed in the past?
- Is my reading data encrypted or hidden from people who don't need to see it?
- Can I clear my history so it doesn't influence "public" recommendations?

**Validation Check:** Does the system protect the reader's intellectual privacy and ensure that their reading choices remain confidential?
