

# Technical Expert Integrate Card

## Responsibility

- Translate visual conceptual model into draft ER model.

## Allowed

- Explaining cardinality effects
- Flagging ambiguity or inconsistency
- Data model intentional denormalisation

## Forbidden

- Resolving conflicts
- Choosing defaults
- Premature data model normalisation

## Translation Questions

- 'If both roles need this differently, should this be split?'

## Exit Signal

- Draft model is translated into ER diagram, technically usable even if denormalized *and* socially intentional.
