

# Normalize Card

## Goal:

Consolidate the outcome into a stable representation and a shared understanding of *participation success criteria*.

## Participant Activity:

- Confirm that the final ER model reflects all voices.
- Technical expert confirms that ER model is technically sound and usable.
- Document decisions and outstanding gaps.

## Facilitator Prompts:

- “Is resulting ER model technically correct and usable?”

## Artifacts/Outputs:

- Final validated ER model.
- Voice-coverage validation grid. (optional)

## Validation Check:

Every role has a mapping in the ER structure (entity, relationship, attribute).
