Observe Card

Goal:
Surface raw stakeholder contexts, roles, pain points, and system expectations before modeling begins.

Participant Activity:
- Read **scenario** and **role(voices) cards**.
- Make sure each participant understands well their role card.
- Map initial domain narratives collectively.

Facilitator Prompts:
- "What facts or stories matter most for this scenario?"
- "Which elements seem critical to everyone's experience?"

Artifacts/Outputs:
- Shared *raw concepts list*.
- Sticky notes or cards tagged with key domain terms.

Validation Check:
All voices have contributed *at least one* domain concept.
